

Lighting Previz

The Little Mermaid · Plantagenet Hall · R13.1 · the lighting drawn on the stage

How to read it

Each picture relights a photo of the stage taken from the house. Pools on the floor and the back wall show where each fixture lands; faint beams show it in light haze.

Colours and levels are read from the show file for every look, cue and song section.

Tabs closed (preshow, Scenes Two, Four and Nine, interval, end): only the FOH bar and the pelmet PixBars reach the tabs; the rest of the rig and the projection are behind them.

Assumed until the rig ID test: pelmet PixBars #33, #35, #37 and LX2 PixBars #34, #36, #38.

Nobody is on stage in the photos, so face light shows as pools, not on faces.
