

R13.1 Review and Fix List

I checked R13 file by file against its real contents and the R9 Production Book, then made the fixes directly in the show files. The structure is sound: 153 cues are in the right places, P8 matches the split pages exactly, there is no strobe, and every media file exists. **Open TLM_Show_R13_1.qlab5.** Your original R13 workspace is kept in docs/archive_R13_original.

STILL TO DO BEFORE TECH

1) In QLab Workspace Settings, set Audio Patch 1 to the StudioLive and Video Stage 1 to the projector. These depend on the show Mac, so they could not be set in the file. 2) Remove any old TLM_R11_FLASHY_Show_Files folder from the show Mac. 3) Get backing tracks for S2-S5, pick S7, and supply house, preshow, interval and exit music and Ariel's Q42.5 line. 4) Cue-to-cue (section 3).

1. Done in R13.1

Area	Change	Why
QLab Q21, Q23, Q25, Q35, Q47	Timed return cue added in each group: 21b, 23b and 25b after 0.2 s, 35b after 0.3 s, 47b after 1.0 s.	R9 used six hand-set desk link times, and R13 dropped them. Without the returns, the full-white flash held until the next GO. Do not also set desk links , or the return fires twice.
QLab Q57 / new Q57b	Q57 now also starts the HAYWIRE chase (P5 M5). The new Q57b fires the 57b white hit, then 57c Ariel special after 0.3 s, stops the chase and plays the new restore SFX.	Ariel restored (57b/57c) had no trigger at all.
QLab, 31 cues	Release cues: each time QLab moves to a new Mantra memory, it sends Level=0 (same cue, same fade) to the memory it is leaving.	Split memories stacked. For example, the Poor Unfortunate Souls look stayed up through the dark lair, and the Pirate finale stayed up at END. In the re-run simulation, no cue picks up stray light.
QLab Q9, Q15, Q15.5, Q19, Q41, Q52	3 s fade-and-stop on the song track (S1, S2, S3, S4, S6, S8).	Real tracks would otherwise keep playing under the next scene.
QLab audio, 58 cues	Re-pointed to the new SFX pack and the 9 supplied songs, with end times set to the real file lengths. The stale R11 links on these cues are cleared, so QLab finds them by their path inside the show folder.	A file swapped under the same name keeps the old 5-10 s end time.
QLab Q19.2	"Periodic rain" now plays a 6 s rain burst.	The group was empty.
QLab tidy	Removed 11 stale "SOUND: build as Fade/Stop" memos, 10 empty disarmed MUS cues and the empty SONGS list. The selected cue list is set to Main.	Clutter.
Mantra .mtr	File-size footer corrected to 4,479,331. It still held the R9 file's size. Nothing else changed.	R9 kept this footer accurate.
Folder	Duplicate control-files zip removed. The R13 workspace and validation files are archived. The manifest, section map, metadata and START_HERE are updated.	One clear set of files.

Checked after editing: all 479 cues decode; there are no duplicate IDs or cue numbers; every fade cue points at a real cue; all 187 Mantra commands target real desk cues; all 80 media files exist with matching lengths. Apart from the changes above, every original cue is identical to R13.

2. Could not be done in the files

Item	What to do
QLab audio device	Workspace Settings > Audio: set Patch 1 to the StudioLive USB device, with outs 1-2 going to ch 11-12. It currently says System Output (MacBook Air Speakers).
QLab video output	Workspace Settings > Video: set Stage 1 to the projector. It currently uses the built-in display.
QLab network interface	Set the MANTRA patch interface to the wired Ethernet adapter.
Mantra network	Art-Net and sACN are both on; turn off the one the U2 node does not use.
Old R11 folder	Remove or rename it on the show Mac. The video cues and the few untouched audio cues still carry R11 links.
Rig count	The patch has 39 LED fixtures (11 TourCOB, 6 PixBars), but the R9 text says 10 and 5. Confirm #38 and #39 exist.
Photosensitivity	Put a flashing-lights and haze notice front of house.

3. Check at the cue-to-cue

Check	What to look for
Flash returns	Q21, Q23, Q25, Q35 and Q47 should snap and then return by themselves. Adjust the pre-wait on the return cue if they feel too short or long.
Memory releases	Run Q8 > S1 > Q9. The Rock Lobster look should fade out cleanly as Theodore comes up. If the desk ignores Level=0, the song look will stay on underneath: tell me and I will change the approach.
Q57 / Q57b	The HAYWIRE chase runs at Q57. At Q57b the white hit goes to Ariel's special and the chase stops.
Songs	Check each song's lighting GOs against the real track, and the fade-outs at Q9, Q15, Q15.5, Q19, Q41 and Q52.
Manual fallback	If you run from the Mantra, press Next Cue again after each flash (or set desk link times only for manual running).

4. Song tracks

9 of 10 songs are now in media/audio/01_Music_Songs. They are 320 kbps MP3s (the sources were 128 kbps MP3s, so a WAV copy would add nothing), with the silence trimmed and all levelled to -18 LUFS, peaks below -1.5 dBTP. They are already wired to the S#.0 TRACK cues. When the backing tracks arrive, save them under new names and drag each onto its cue.

Song	Needed	Supplied file	Status
S1 Rock Lobster	Original + vocals	S01 Rock Lobster (original).mp3	OK. Music-video version, 7:05 long: confirm the cut
S2 Feeling Good	Backing only	S02 Feeling Good (vocal - swap for backing).mp3	Vocal remix: still needs backing
S3 Part of Your World	Backing only	S03 Part of Your World (vocal - swap for backing).mp3	Jodi Benson vocal: still needs backing
S4 Wellerman	Backing only	S04 Wellerman (swap for backing if vocal).mp3	Looks like a sung version: check, and swap if it has vocals
S5 Time of My Life	Backing only	S05 The Time of My Life (vocal - swap for backing).mp3	Vocal video version: still needs backing
S6 Crab Rave	Original	S06 Crab Rave (original).mp3	OK
S7 Jellyfish chorus	TBD	-	Song not chosen
S8 Poor Unfortunate Souls	Original + vocals (dance)	S08 Poor Unfortunate Souls (original).mp3	OK. Film version, includes spoken lines
S9 Absolutely Everybody	Original + vocals (dance)	S09 Absolutely Everybody (original).mp3	OK
S10 He's a Pirate	Original	S10 Hes a Pirate (original).mp3	OK (1:26)

SONG FADES - DONE

A 3 s fade-and-stop has been added at **Q9, Q15, Q15.5, Q19, Q41** and **Q52**, because otherwise the real tracks would keep playing under the next scene. House, preshow, interval and exit music, and Ariel's line Q42.5, are still silent placeholders.

5. New SFX pack, wired into the show

All 40 sounds from the six zips are used. Each is a ***_v2.wav** file saved beside the cue's old file, and QLab now points at the new files. The combination cues (Q19-Q26 storm, Q50 lair) are layered from the pack. The wind, rain and ocean loops are summed sample-for-sample, so they stay seamless, with the creaks placed inside the loop. The untouched originals are in media/audio/00_SFX_Pack_2026-09-28_originals.

QLab cue(s)	New file	Built from	Loop
Q4	Q004_SFX_Low_Ocean_Bed_v2.wav	24_LOW_OCEAN_BED.wav	Yes
Q31	Q031_SFX_Ocean_Bar_Ambience_v2.wav	39_OCEAN_AMBIENCE_MAGICAL.wav	Yes
Q45	Q045_SFX_Comic_Ocean_Bed_v2.wav	24_LOW_OCEAN_BED.wav	Yes
Q39	Q039_SFX_Palace_Intro_v2.wav	40_PALACE_AMBIENCE_UNDERSEA.wav	
Q60	Q060_SFX_Ceremony_Bed_v2.wav	40_PALACE_AMBIENCE_UNDERSEA.wav	Yes
Q41	Q041_SFX_Low_Underscore_Palace_v2.wav	39_OCEAN_AMBIENCE_MAGICAL.wav	

THE LITTLE MERMAID - R13.1 REVIEW AND FIX LIST

QLab cue(s)	New file	Built from	Loop
Q58	Q058_SFX_Chase_Comedy_Music_v2.wav	35_CROSSFIRE_CHASE_MUSIC_UNDERSEA.wav	
Q5, Q28, Q48	Q005_SFX_Spirit_Magic_v2.wav	01_SPIRIT_MAGIC_IN_UNDERSEA.wav

Q53, Q54, Q55, Q56	Q053_SFX_Transfer_Sting_v2.wav	31_VOICE_TRANSFER_STING_WATER.wav	
Q57	Q057_SFX_Magic_Sequence_Resolve_v2.wav	32_VOICE_HAYWIRE_MAGIC.wav	
Q57b (new)	Q057-5_SFX_Voice_Restore_Resolve.wav	33_VOICE_RESTORE_RESOLVE.wav	
Q62	Q062_SFX_Magic_Sting_Dialogue_v2.wav	37_WEDDING_MAGIC_STING.wav	
Optional NEW cue in Q63.5 or Q64	Q063-5_SFX_Finale_Transition_Magic.wav	38_FINALE_TRANSITION_MAGIC.wav	
Q6, Q16, Q32, Q36.5, Q61	Q006_SFX_Evil_Chord_v2.wav	03_OCTAVIA_EVIL_CHORD_DEEP_SEA.wav	
Q42	Q042_SFX_Evil_Chord_Tension_Bed_v2.wav	03_OCTAVIA_EVIL_CHORD_DEEP_SEA.wav	
Q9	Q009_SFX_Short_Sting_v2.wav	06_COMEDY_STING_BUBBLES.wav	
Q12	Q012_SFX_Comic_Intro_v2.wav	06_COMEDY_STING_BUBBLES.wav	
Q10	Q010_SFX_Fanfare_v2.wav	05_QUEEN_FANFARE_UNDERSEA.wav	
Q19.1	Q019-1_SFX_Fart_Sound_v2.wav	07_FART_BUBBLE_GAG.wav	
Q47	Q047_SFX_Jellyfish_Sting_v2.wav	34_JELLYFISH_COMEDY_STING.wav	
Q61.5	Q061-5_SFX_Comic_Sting_v2.wav	36_WEDDING_INTERRUPTON_STING.wav	
Q19	Q019_SFX_Wind_Comedy_Rain_v2.wav	08_WIND_LIGHT_STORM.wav + 10_RAIN_LIGHT_STORM.wav	
Q20	Q020_SFX_Wind_Rain_Build_v2.wav	09_WIND_HEAVY_GALE.wav + 10_RAIN_LIGHT_STORM.wav	Yes
Q22	Q022_SFX_Wind_Rain_Ship_Creaks_v2.wav	09_WIND_HEAVY_GALE.wav + 11_RAIN_HEAVY_TORRENTIAL.wav + creaks 18/19/20	Yes
Q21	Q021_SFX_Lightning_Crack_Thunder_v2.wav	12_LIGHTNING_CRACK_1.wav + 16_THUNDER_MEDIUM_ROLL.wav (+0.6 s)	
Q23	Q023_SFX_Close_Thunder_Impact_v2.wav	14_LIGHTNING_CRACK_3_MAJOR.wav + 17_THUNDER_CLOSE_HEAVY.wav (+0.15 s)	
Q24	Q024_SFX_Ship_Groan_Water_Impact_v2.wav	21_SHIP_GROAN_HULL_STRAIN.wav + 22_WAVE_HIT_SHIP.wav (+0.8 s)	
Q25	Q025_SFX_Major_Thunder_Heavy_Rain_v2.wav	13 crack + 17 close + 15/16 rolls over 11 heavy rain	
Q26	Q026_SFX_Splash_Low_Water_Bed_v2.wav	23 splash + 25 storm decay + 24 ocean bed	
Q50	Q050_SFX_Dark_Lair_Ambience_v2.wav	24_LOW_OCEAN_BED.wav low-passed at 500 Hz	Yes
Q19.2 (new)	Q019-2_SFX_Rain_Burst.wav	10_RAIN_LIGHT_STORM.wav + 08_WIND_LIGHT_STORM.wav (-6 dB)	

No replacement was supplied for Q11 soft resolve, Q43 cue-card underscore or Q59 land ambience; those keep their current placeholder sounds. Q19.2 has a new 6 s rain burst (10 rain light + 08 wind light). Q39 and Q60 share the palace ambience, and Q4 and Q45 share the low ocean bed.

6. Unused media

6 videos (BG-08 B, BG-10, BG-12, BG-14, BG-15, BG-24) and 22 stills are unused. Keep them as spares; the stills make useful fallbacks. The old placeholder audio files beside the new ones are no longer used and can be deleted.

7. Checked in the original R13 (before edits)

Check	Result
Control file hashes	Both match the R13 validation SHA-256 values. The inner zip held identical copies, so it was removed as a duplicate.
Mantra structure	153 split cues on P2/P3/P4 match the section map names and order. Every P8 backup cue is identical to its split twin. 9,344 strobe values are all 0. Chases are 6@150, 6@144 and 8@168 BPM, plus HAYWIRE 5@120 BPM. SAFE LIGHT P2 M10 and P7 M7 are identical (FOH #1-6 at 70% white).
QLab to Mantra	146 OSC cues target valid cues, with no duplicates, and every OSC fade equals the desk cue fade. The only split cues without a trigger are 21b, 23b, 25b, 35b, 47b (link-time returns), 57b and 57c.
Media	All 78 referenced files exist at the relative paths. Folder counts match the docs (27 stills, 24 videos, 55 audio). Video is 1080p HEVC at 24 fps.
Network	MANTRA patch is Generic OSC / UDP to 2.0.0.1:8000, and the desk is set to 2.0.0.1 / 255.0.0.0. Both match the guide.
