## 1 Stream Deck

| Key         | Where        | Does                                                  |
|-------------|--------------|-------------------------------------------------------|
| GO          | row 1, key 1 | QLab GO (Space)                                       |
| PREV        | row 1, key 2 | Playhead up (↑)                                       |
| NEXT        | row 1, key 3 | Playhead down (↓)                                     |
| PANIC       | row 1, key 5 | QLab Panic (Esc) — fades and stops everything in QLab |
| VIDEO BLACK | row 2, key 1 | F13 → E2 VID-99 BLACK                                 |
| SAFE LIGHT  | row 2, key 2 | F14 → E3 SAFE LIGHT (Mantra P2 M10)                   |
| STOP SOUND  | row 2, key 3 | F15 → E1 STOP ALL                                     |
| SAVE        | row 3, key 5 | Cmd+S — rehearsals only                               |

Every key is a plain Hotkey, so QLab must be the front window. The profile (05\_Stream\_Deck/TLM QLab Show.streamDeckProfile) holds this layout.

### A Import the profile

1. Install the Elgato Stream Deck app; plug the Stream Deck in.
2. Double-click TLM QLab Show.streamDeckProfile > Import. Select the TLM QLab Show profile.
3. If the import fails, build the keys by hand: System > Hotkey on each key, press the key in the table, add the title.

### B Give the emergency cues their hotkeys in QLab

**NOT SET IN THE WORKSPACE**  
E1–E3 exist below cue 66 but have no hotkeys yet.

1. Select **E1 STOP ALL** > Inspector > Triggers > tick Hotkey > press F15.
2. Select **E2 VID-99 BLACK** > Triggers > Hotkey > F13.
3. Select **E3 SAFE LIGHT** > Triggers > Hotkey > F14.
4. Save. Press each Stream Deck key once with the projector and the Mantra on.

Optional: Figure 53's QLab plugin can fire GO, Panic and any cue even when QLab isn't in front — keep the same positions and icons. Allow OSC access in Workspace Settings > Network (no passcode).

## 2 Tech test run

Run the test straight from the workspace in the passes below; no script is needed.

### Before you start

- ☐ QLab front window, Edit Mode
- ☐ Haze off, water disconnected
- ☐ Anyone on stage warned before storm and flash cues
- ☐ Mantra on, Default Show loaded, O (All Cues Off)
- ☐ Playback low on the StudioLive
- ☐ SAFE LIGHT (F14) ready throughout

### Run order

| Pass           | How                                                                                       | Pass criteria                            |
|----------------|-------------------------------------------------------------------------------------------|------------------------------------------|
| 1 Check        | Scroll the cue list: no red (broken) cues. Workspace Settings: audio, video, network set. | No red cues except known placeholders    |
| 2 Emergency    | F14 → P2 M10 · F13 → black · F15 → stop                                                   | Desk, projector and audio respond        |
| 3 Step through | From Q1 with SM, show operator and Sound on headset: GO each cue, tick the table below    | Every cue fires light, sound and video   |
| 4 Critical     | Step again from Q20 (storm), Q33 (transformation), Q45 (jellyfish), Q52 (voice transfer)  | Flashes return; releases; HAYWIRE on/off |

| Pass       | How                                                     | Pass criteria                                        |
|------------|---------------------------------------------------------|------------------------------------------------------|
| 5 Songs    | From each song group: S# GO, then each section GO       | Track starts; scene memory released; sections change |
| 6 Show day | Quick step-through of one cue per memory with sound low | System check before the house opens                  |

**SAFETY DURING THE TEST**

Haze off and water disconnected. Warn anyone on stage before storm, flash and HAYWIRE cues. Keep playback low — songs start for real. SAFE LIGHT stays one key away.
